# «FLEET-2026»

In June 2026 Kronstadt will again become the venue where the future of the industry becomes a reality. The International Maritime Defence Show FLEET-2026 is a demonstration of the power of technologies, cooperation and strategic course that determine the development of the maritime industry for the years ahead.

## RESULTS FLEET-2024

Exposition **8000 m<sup>2</sup>**

**225** exhibitors

**14** foreign delegations

**more than 40** business events

**225**  
exhibitors

This show unites both the professional audience and broad public ranging from directors of corporations and representatives of the Navy to students and young sailors. Each and everyone will find a point of attraction here:

- for exhibitors it is an opportunity to present their developments and conclude contracts;
- for delegations it is a unique site for conducting negotiations and exchanging experience;
- for broad public it is an outstanding programme and acquaintance with the history and future of the Navy.

# PROGRAM

The business program of the FLEET-2026 is a space for a live dialogue. Here state customers, business and science get together in order to jointly shape decisions and to determine the vector of the industry development.

The FLEET-2026 turns Kronstadt into a ground for significant events. Spectacular demonstrations and sports activities create an atmosphere in which state-of-the-art technologies go side by side with traditions.

- Roundtables and conferences attended by the experts of the industry
- Presentations of the innovative developments
- Exchange floor for business contracts under the auspices of the Russian Ministry of Trade
- Signing of agreements between enterprises and state-owned entities

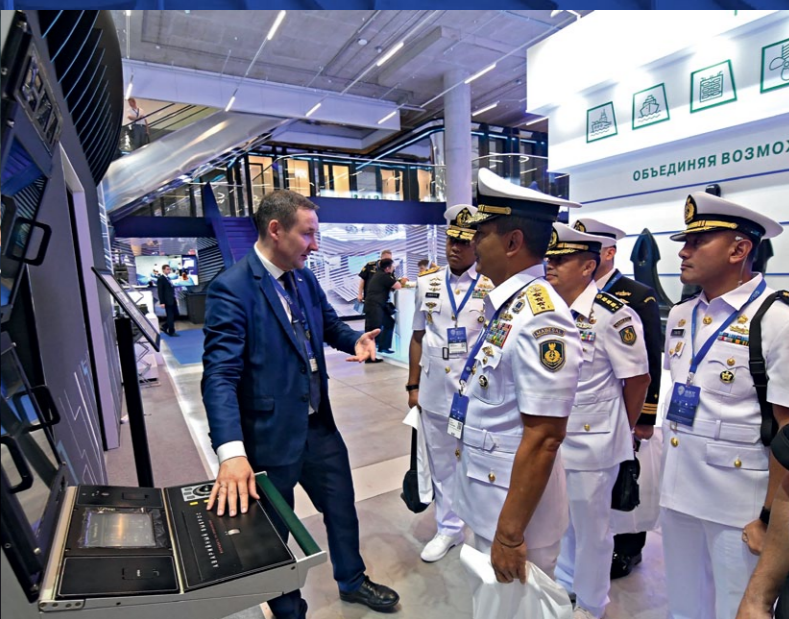

- Demonstration of naval ships and boats in the water area of the Sredneya (middle) harbour
- Air show by an aerial aerobatics group of the Russian Aerospace Forces
- Sports programme: rowing races, children's sailing regatta
- Career guidance projects for young people

40+

science and business events

# COURSE FOR 2026

## FUTURE UNMANNED VEHICLES

Special exposition will be focused on the promising developments of unmanned vehicles and advanced technologies employed in the interests of the Navy and for accomplishing the missions of the special military operation (SMO).

## INNOVATIONS OF NAVIGABLE REGIONS

The joint exhibit booth of the Russian Ministry of Trade integrates best achievements of the domestic industry and new technological solutions.

## LIVE WATER SHOWS

At the facilities of the Fort 'Peter I' guests can view civilian purpose vessels and make a water trip watching technologies in action.
